Hey Mike,

You are a **professional** skeptic, no? So how come you haven't jumped all over proving, showing that we're slightly deluded to have posted irrefutable scientific proof that the Meier case is real? Now, if you should actually have an answer, I will be REAL interested in hearing your story about the elves or whatever you can come up with this time. Could the fact that the bozos at CFI West can't even duplicate one of Meier's photos in over two years have anything to do with why you (collectively) have scampered away with your collective tail between your legs? Doncha think a little encounter on Science Friday is in order?
