Subject: RE: Multiple choice

Michael, you forgot one other choice, "C"

C.) He's a man with nothing going for him except that he managed to attract some media attention with fuzzy photos, and he got a crowd of disciples hooked, too, because they didn't know any better.

James Randi

Subject: Multiple choice

Dear skeptics,

It's time that you answered just ONE multiple choice question from me:

A.) Billy Meier possesses above-genius level abilities in photography, film making, videography, model making, juggling, special effect, digital effects, ventriloquism, sound recording and engineering, metallurgy, physics, space propulsion technologies, astronomy, history, mathematics, geology, environmental sciences, clairvoyance, mass hypnosis, etc. and also possesses the single-handed ability (no pun intended?) to accomplish all of the aforementioned without financial or material assistance or collaborators.

Or:

B.) He's a genuine UFO contactee.

Rules: Multiple choice means that you must choose one of the possibilities presented. Failure to do so results in the choice automatically being registered, and reported, as B.)

Take your time, this is a toughie.

MH
