Dear Jeff,

Thanks for posting Alfred's review. Regarding Alton's comments, this is, unfortunately, indicative of the illogical, quasi-hysterical non-thinking that clearly expresses why humanity simply isn't ready for contact with a more advanced species. Where in Meier's material do we find this "black and white", "perfect beings incapable of lies or error", the "agenda" , the "Swedish" farmer, "extra-terrestrial fanatics", "ancient civilizations...pushed or pulled, etc.", "manipulative liars from above"?

I point out these paranoid, inferential, assumptive and unsubstantiated comments since they compromise almost the sum totality of Alton's comments. Perhaps now people might begin to understand how frustrating it's been that the most substantiated, well-documented and evidence-laden UFO contact case in history has been constantly broad-sided and that such unsubstantiated idiocy was formerly given far more credibility than Meier's material. It's only because of people like Jeff, Alfred and others who may well have their own issues and doubts with the Meier material and/or my presentation of it, that sufficient light is now being shined on the evidence so that intelligent people can begin to reason and think it through themselves, which has always been one of the stated purposes of the case.

MH
