**Subject:** Tarry not!

Derek,

I think that you should update the letters page, especially in light of the stunningly clear, impeccably logical response from Jeff Wagg...and his delightfully wise statement, "If there's not enough evidence to support the model claim, the model claim is suspect." Of course, he had some other gems too, which I'll be quoting soon, as you can imagine.

And don't worry, after attending to some film related business, screenings, etc. you can expect a little more...promotional assistance from yours truly.

MH
